Week 7

MET: Refinement

MHCI: Observation

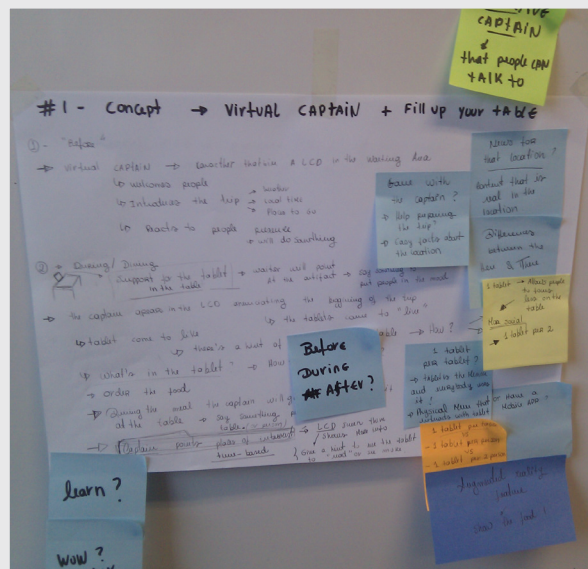

# MET - updates

## Concept Refinement

This week the MET team presented their new concept. Based on their feedback, the team has started refining the concept as a whole.

Currently, the team is working on three focus areas. The script of the captain, low fidelity prototypes for the Menu application, and analyzing the technical feasibility and challenges of implementing the concept.

## Participant Recruitment and Observation

This week MHCI continues participant recruitment. We have three leads ranging from restaurants to the tourism and hospitality school. We have also begun observation starting at themed restaurants. A restaurant setting provides us with further understanding of not only tourist diners (our primary audience), but also of event coordinators, bus drivers (tour guides), dancers and artists, waitstaff, chefs, and even restaurants owners.
